Additions & Remodeling

Personalized Service

On-Site Supervision Directly by Owner

Licensed & Bonded

## Residential Additions & Remodeling

Before

At Brassil Construction, we believe not only in quality construction but in quality design. Our goal is to enhance the original structure, not detract from it. An addition should never look like an “addition” or after thought. We will work with your plans or provide architectural services for you—then follow your project through to completion. Our services are comprehensive. With over 30 years experience, we can act as your General Contractor, Project Manager or Superintendent.

After

## Commercial Construction

Brassil Construction is also experienced in many types of commercial construction. Interior offices remodels and expansions, store front showrooms and historic restorations are just a few of the many commercial projects we have completed over the recent years.

## Residential New Construction

For over 30 years, Brassil Construction has constructed projects of all sizes throughout the Chicagoland area and suburbs. Our projects range from kitchen, bath and basement remodels to additions of all sizes and custom built homes. We have a strong reputation for quality and the majority of our projects result from the referrals of our satisfied customers. We believe in a "hands-on" approach and supervise each job personally. You will always deal with the owner, never a salesman.

# Deck Remodeling

In addition to constructing spaces that provide improved living, Brassil Construction is committed to quality construction and job safety. Each project follows strict building codes and an attention to detail that will ensure that each project will be structurally sound as well as aesthetically pleasing. We are licensed and bonded and take pride in our work.
